

cess of your business or organization.

A business' website is often its front-line of marketing contact and information distribution. Your organization will need to entrust the creation, publishing, and maintenance of your website to qualified individuals that will strengthen this communication tool. Part of this responsibility will be constant updates to website information. It is fundamental to your success that each visitor to your website have access to the latest news and information about your organization and its service.

Training

In an industry dominated by technical jargon and complicated solutions to complicated problems, having an adept liaison between your organization and technology companies is essential. In addition, reliable and efficient training for your staff is vital to your network's success. We suggest incorporating training for staff members, on-call question answering and trouble shooting into your network plan.

We offer a variety of computer training programs to help individuals, non-profit organizations, small and large businesses understand the needs and

the know how of today's information technology demand.

Wiring

In the last ten years an efficient computer network has become a necessity for any business. Without question, any company expecting to keep pace with today's high speed business world must now back that computer network with high-speed Internet connection. Such modern tools as a paperless office and unlimited file transfer capabilities make or break a business. With this new evolution it is more crucial than ever to facilitate these needs during the construction process. Contracting network installation in the early stages of construction is the most cost effective way to meet your needs. Addressing factors such as wiring within structure walls and concealed hardware prior to construction will take care of costly post-construction changes.

Technical Support

Maintenance of your computers' hardware and software is necessary to keep your network working fluidly. We suggest regular assessments of your system to ensure that your organization utilizes the best and most efficient products for your unique needs. Replacement of old computer hardware will be part of this process. Software upgrades will allow your network to continually meet your staff's needs.

Web Sites

In today's fast-paced business world organizations are crippled without an Internet presence. From corner florists to international financial institutions, a company's Internet presence determines the level of success they are capable of achieving. Without this foundation a company forfeits the ability to provide information about their services to a worldwide audience. Web presence is a key component to the longevity and suc-
